Senior analyst with 4 years at Citibank managing data pipelines, building enterprise reporting platforms, and delivering actionable insights that supported strategic decisions across Finance and Risk. Experienced in SQL, Python, Tableau, and Power BI with a track record of automating workflows, improving data quality, and communicating findings clearly to senior stakeholders; pursuing an MBA in Data Analytics.

EDUCATION & CERTIFICATIONS

University of South Florida - MBA, Data Analytics Concentration (In Progress) | Tampa, FL | Expected 2027

Relevant: Statistical Modeling (R), Regression Analysis, Predictive Analytics, Data Visualization, Operations Management

University of South Florida - BS, Business Analytics & Information Systems | Tampa, FL

Certifications: CBAP (In Progress) | Data Science - Tableau | MS Office Specialist | BA Grad Cert, USF

PROFESSIONAL EXPERIENCE

Citibank | Finance Regulatory & Data Analyst | Tampa, FL Aug 2022 - May 2026

- Queried and transformed millions of rows of enterprise financial data using SQL and Python, building structured, decision-ready outputs for Finance and Risk stakeholders across recurring and ad hoc reporting cycles
- Designed and maintained Power BI and Tableau dashboards that gave senior management real-time visibility into operational KPIs, translating complex data into clear, actionable stories for technical and non-technical audiences
- Led 10+ automation and reporting projects end-to-end in an Agile environment, from requirements gathering and data modeling through QA, UAT, and stakeholder sign-off
- Managed data quality and integrity across enterprise reporting systems, enforcing governance standards and documenting data lineage, transformation logic, and business rules to ensure audit readiness and regulatory compliance
- Collaborated with cross-functional teams across Finance, Risk, and Technology to understand business needs, define success metrics, and deliver analytical solutions that improved operational efficiency by ~40%
- Mentored junior analysts in SQL, data modeling, and best practices, supporting team capability development and contributing to a culture of continuous improvement

LOFT | Customer Operations Associate | Tampa, FL Aug 2018 - Jul 2020

- Exceeded sales targets by 20-30% through direct customer engagement, developing strong communication and cross-functional collaboration skills in a fast-paced, client-facing environment

SKILLS

Technical Skills: SQL, Python, Tableau, Power BI, Excel (Advanced), R, MS Copilot, KNIME Automation
